

Karo Stein, Project Manager, TriCity Canada Inc.

Growing up and around the construction industry, Karo started his introduction into construction at a young age through hands-on field experience. He began his career as the site superintendent of a 58 townhouse development in Squamish. Karo's experience quickly grew as he participated in various jobs in BC's Lower mainland overseeing the construction of warehouses, single family homes and multi tenanted developments. As Superintendent of Infrastructure for Suter Brook, Karo oversaw the construction of two new 27 storey towers comprising 3 levels of parkade, 697 residential units and a pedestrian shopping center. Karo's passion lies with the finding innovative solutions and opportunities in the construction industry. This enthusiasm brought him to his current role as Project Manager for Tri City Canada. Tri City built the premier 6 storey woodframe building in BC winning the Canadian Wood Council Award. Karo continues to oversee new innovative projects in Red Deer, Vernon & Kamloops. An avid outdoorsman, when you don't find Karo on site, you will find him on his acreage outside of Sun Peaks with his 2 beautiful children or climbing the Rockies.
