

**Peter Moonen – Municipal Affairs & National Sustainability Manager,  
WoodWORKS! BC**

Peter works to assist designers and builders in understanding how to use wood to enhance environmental performance and reduce the ecological footprint of buildings. He regularly presents on achieving greater sustainability to various local, Canadian and international groups. He is also a Canadian representative at the U.N. Timber Committee and reviewer specializing in wood and the green economy for the Forest Products Annual Market Review published by the United Nations Timber and Forestry section with special emphasis on the role of wood in the green economy, including green design. In addition to a degree in Marine Biology and Zoology, he studied forestry at UBC and Journalism and Public Affairs in Alberta.
