

Kevin Rocchi, MAsc, E.I.T.
Technical Service Specialist
[Structural Engineering]

Kevin joined the Canadian Wood Council in 2014 and holds the position of Technical Service Specialist. Kevin completed both his Bachelor of Applied Science in Civil Engineering (COOP) and his Master of Applied Science degrees at the University of Ottawa. Since joining the CWC, Kevin's main responsibility has been updating the technical content of the CWC publication known as the Engineering Guide for Wood Frame Construction. Kevin is involved in the revision of CWC's design tools and publications and he is also responsible for the technical support of the WoodWorks[®] Sizer, Shearwalls, and Connections software for both Canada and the United States. He is currently working on completing the work experience to obtain a professional engineering licence in Ontario.
