

Atlantic WoodWORKS!

Services to Architects, Engineers, Contractors and Officials

Project Design - Technical Advice & Consultation

- Product sourcing
- Suitable material selection for building application
- Structural, fire, seismic, acoustic, architectural and environmental
- Interpretation of the building code.
- Inform you of what structural and aesthetic wood products are available in your region
- Technical literature and case studies on specific construction projects
- Environmental Product Declarations and Life cycle analysis of common wood products
- Available manuals and design tools

Promotion

- **Seasonal project showcase** of a construction project in the Wood Design and Building magazine that has a circulation of over 38,000 copies in North America. This is an opportunity for North American wide exposure.
- **Annual case study** of an Atlantic building project to promote wood use and encourage the design community to use wood in various construction projects.

**If you have any projects that you would like to submit for publishing evaluation contact us below:*

- **Wood Design Awards** - Would you like to be crowned as a wood champion? Submit your project nominations on our website for the annual Atlantic WoodWORKS! Wood Design Awards. There is no fee to nominate a project and nominees receive a complimentary invitation to the awards ceremony. Winners will receive a commemorative trophy and extensive media exposure; and will have their project appear in a multi-page profile in our annual hard-cover coffee table book Celebrating Excellence in Wood Structures – North American Wood Design Award Winners.

Free Professional Development/Liaison

- Continuing education credits for Engineers, Architects, Officials and Contractors
- Wood Design Seminars
- Lunch and Learns

Design Tools

- We have a vast selection of design tools available on our website
- Consult with us about your technical needs and we may have the solutions

Demonstration Projects/Products/Research

- We have the ability to arrange full scale testing of new products and building systems.
- Do not re-invent the wheel. We can connect you with people who have designed and constructed similar projects, to prevent you from making the same mistakes.
