

Presentation Description

“Mid-rise challenges and engineered lumber solutions”

As a supplier of engineered lumber and a valued partner with engineers on over 50 mid-rise projects, the team at Weyerhaeuser would like to share some important mid-rise details and procedures, and illustrate how engineered wood products and services were applied to help ensure the success of each project.

Bio

Andy Teasell is the Canadian Engineering and Technical Services Manager for Weyerhaeuser’s Trus Joist products. His 25 years’ experience includes construction project management, structural engineering, and engineered wood product support. Born and raised in Montreal and a graduate of McGill University, Andy now resides in “sunny” Vancouver.
