

## Sukh's Bio

Sukh Johal is a double graduate from the British Columbia Institute of Technology holding Diplomas in both Civil/Structural Engineering (1987) and Business Administration (1992). He also holds a Masters of Business Administration degree in International Business from the Asia Pacific Institute, Graduate School of Management (1996).

For the seventeen years, before joining up with the Canadian Wood Council, Sukh had been extensively involved in the design and supply of “engineered wood component products” to major wood frame construction projects in all of the western provinces and western states of North America.

Currently for WoodWORKS!BC in addition to being a technical advisor, he is also the Midrise Technical Lead where his previous expertise, experience and network base (especially from the Washington and California markets) has been a major contribution to the success of the BC Six Storey Wood Frame initiative change thus far.

Sukh lives in Richmond with his wife and three children and can be seen most nights out on the Soccer pitch coaching his various children's Soccer teams.

Wood **WORKS!** is a Canadian Wood Council initiative to increase the use of wood in construction, through education, training and awareness.
